Dear Dr. McAllister,

I have read with interest the Report of the Council of 1990 and noted the diversity of basic research funded by the Council.

Dr. H. Hank Simms and I would appreciate the opportunity to submit a request for funding of a project designed to study the effect of extracorporeal circulation on PMM leukocyte cell surface receptors CR1/CR3 and IgG receptors FcR I II & III and, subsequently, phagocytosis.

If the Council would be receptive to a request for funding, please send me instructions for application.

Thank you.

Yours very sincerely,

Karl E. Karlson, M.D.
